

# Minitab Solution Center July 2025 Release

1.	New Features in Minitab Solution Center.....	1
2.	New Features in Minitab Web App .....	1
3.	Problems Resolved in Minitab Web App .....	2
4.	New Features in Minitab Data Center .....	2
5.	New Features in Minitab Workspace Web App .....	3
6.	New Features in Minitab Dashboards.....	3

## 1. New Features in Minitab Solution Center

You can now quickly access files that were recently opened or marked as favorites. In the repository section of the landing page, access the files you need quickly and efficiently by viewing recently accessed files or by marking files as favorites. Both sections display recent and favorite files across your repositories (Microsoft OneDrive® and Google Drive™).

## 2. New Features in Minitab Web App

### Variability Chart Enhancements

For Variability Chart in Quality Tools, you can now enter one or more categorical **By variables** to create a separate Variability Chart for each category level for comparison. You can also request a log-10 transformation to the Y-scale of the Means chart when you graph the variability of response data across different factors that are highly skewed or affected by severe outliers.

### Transportation Add-on Module

The Transportation Module helps transportation professionals quickly get started with data analysis to do everything from reducing transit time to analyzing key performance indicators related to operational efficiency, asset utilization, safety, environmental performance, financial performance and customer service.

## **Retail Add-on Module**

The Retail Module helps retail professionals quickly get started with data analysis to do everything from increasing sales to analyzing key performance indicators related to customer experience, inventory management, operational efficiency, financial performance, store operations and sales.

## **3. Problems Resolved in Minitab Web App**

Subset Worksheet does not work as intended when the data set includes a large number of date/time values. (TT187158)

Unintended behavior occurs with certain date/time formats. (292654)

## **4. New Features in Minitab Data Center**

### **Reorder Columns**

Quickly organize the order of one or more data columns within the Data Grid. The reordering of columns allows you to arrange columns according to your needs and preferences.

### **Data Summary Panel Visualizations**

The Data Summary Panel now provides larger interactive data visualizations that summarize each column of data. Using histograms, you can easily exclude numeric values that are greater than/less than target values or exclude date values that are before/after target dates. Using bar charts, you can directly filter or replace specific data values.

### **Calculated Column**

Create new columns of data based on custom equations using hundreds of predefined mathematical functions.

## 5. New Features in Minitab Workspace Web App

### **Add linked files to your project**

You can now quickly access external files directly from Workspace projects by adding linked files. Add links to a variety of files, including documents, presentations, spreadsheets, images, and any file created in the Minitab Solution Center.

### **Adjust column widths in forms tables**

You can quickly and easily adjust column widths of tables on forms to make room for longer text values as needed.

## 6. New Features in Minitab Dashboards

### **Copy & Remap Assets**

In Edit mode, you can copy and paste dashboard assets and remap existing assets to a different data source.
